

ENROLLMENT SOLUTIONS FOR BOTH ON-CARD AND OFF-CARD ENROLLMENT

ON-CARD ENROLLMENT

IDEX Biometrics' incredibly innovative yet simple on-card enrollment solution addresses what the industry previously viewed as the largest barrier to adoption for biometric smart cards for payments, remote in-person enrollment.

This low-cost and seamless end-to-end solution, for both issuers and users, allows card users to securely enroll themselves without visiting a bank branch. Enrollment takes place entirely inside the smart card using its standard secure EMV chip and, uniquely, without the need to connect the enrollment device or smart card to a computer, smartphone or any other connected device. With IDEX's On-Card Enrollment solution, there is no possibility of any tampering or external interference during the enrollment process. Furthermore, there is no need for the card supplier to support a multitude of mobile phone or desktop apps to support a graphical user interface (GUI).

IDEX's enrollment device is lightweight and can be posted to the user. The device's physical shape guides the user through the process. Enrollment takes less than a minute and the IDEX solution has been designed to be incredibly user friendly. User friendly enrollment is known to aid adoption as well as the on-going usability of biometric smart cards. Once enrollment is complete the device can be discarded.

IDEX was the first to launch On-Card Enrollment solutions, back in 2017. These solutions can be used for contactless only, contact-based and dual-interface smart card applications.

OFF-CARD SOLUTIONS

IDEX Biometrics also offers white label software applications designed to enable financial institutions to enroll customers within a bank branch, for example using a tablet device or a kiosk. These solutions are aimed primarily at financial institutions where customers would typically be expected to activate their cards in-person rather than remotely.

IDEX Biometrics is more than just a component supplier, we are experts in biometric fingerprint solutions.

IDEX Biometrics ASA (OSE: IDEX and OTCQB: IDXAF) is a leading provider of fingerprint identification technologies offering simple, secure and personal authentication for all. We help people make payments, prove their identity, gain access to information, unlock devices or gain admittance to buildings with the touch of a finger. We invent, engineer, and commercialize these secure, yet incredibly user-friendly solutions. Our total addressable market represents a fast growing multi-billion-unit opportunity.
